Investment Thesis

Backlog Machine. Funded backlog hit a record $1.5B [8-K guid], up 37% YoY, with $683M in Q1 bookings and a 1.4x book-to-bill. Demand for US tactical drones and counter-UAS is real and contracted. Q1 FY27: Record Revenue, Thinner Margin. Q1 FY2027: revenue up 5.7% YoY to a record $480.5M, adjusted EPS of $0.59 against a $0.25 estimate, bookings of $683M for a 1.4x book-to-bill and a record $1.5B funded backlog. The margin side was softer: adjusted EBITDA of $53.4M (11.1% of revenue) fell 5.6% YoY as Switchblade

Q1 FY27: Record Revenue, Thinner Margin. Q1 FY2027: revenue up 5.7% YoY to a record $480.5M, adjusted EPS of $0.59 against a $0.25 estimate, bookings of $683M for a 1.4x book-to-bill and a record $1.5B funded backlog. The margin side was softer: adjusted EBITDA of $53.4M (11.1% of revenue) fell 5.6% YoY as Switchblade sales dropped $56.9M on order delays and organic revenue fell 3.5% ex-acquisition.

Right Business, Wrong Price. At $116.85, the DCF base of $86.91 implies 26% downside. FY27 growth is only ~10% with flat adjusted EPS, yet the stock prices a defense supercycle. Healthy company, stretched multiple. We rate the shares Hold, Valuation Concerns: the business is healthy, and the price is the problem.

BLENDED TARGET

The valuation uses a multi-year unlevered free cash flow DCF on a detailed EBIT bridge: revenue to EBIT to cash taxes, then adds back D&A and subtracts capex and working-capital investment. The discount rate is the live CAPM cost of equity: the 10-year Treasury yield plus beta times the market-implied equity risk premium.

Net debt of $271M is lease-inclusive: $730.1M of long-term debt plus $120.8M of operating lease liabilities, less $278.4M of cash and $301.8M of short-term investments at Q1 FY2027. Terminal value is the average of two legs, weighted 50/50: a Gordon perpetuity on terminal-year free cash flow and an exit EV/FCF multiple (15.0x Bear, 20.0x Base, 25.0x Bull). Targets are divided by the 2036 share count, which grows the current 50.8M shares at 1.5% a year for dilution.

The franchise deep dive

Record $1.5B funded backlog, up 37% YoY, with 1.4x book-to-bill and $2.8B total funded plus unfunded backlog

Counter-drone and directed energy: $465M Army LOCUST contract plus $500M Titan IDIQ

BlueHalo acquisition adds space, cyber, and directed-energy portfolios to the core drone franchise

Valuation cross-check

P/E (fwd) 27.6x

DCF Base $86.91

EV/Revenue (NTM) 3.1x

DCF implies 26% downside. Paying 27.6x forward earnings for a company guiding flat adjusted EPS is a steep price even for a defense compounder.

Defense primes trade ~15-20x forward earnings

AVAV carries a premium to traditional primes on growth expectations, but FY27 guidance growth of ~10% does not justify the gap.

Shares fell over 40% YTD before the Q4 bounce

The stock trades below its prior peaks but above its pre-BlueHalo multiple range; the defense premium expanded without earnings to match.

What to monitor

Nov 2026. Q2 FY27 Earnings (Two-Sided): Must show organic recovery after Q1's -3.5% ex-acquisition decline and the Switchblade order delays.

Spring 2027. Defense Budget Funding (Positive): Management assumes new defense budget funds their programs; a funding unlock de-risks the FY27 plan.

Agency risk score 20 of 100: high agency risk, the value-trap profile

The score follows the website's Executive Alignment & Agency Risk model: insider ownership up to 40 points, open-market Form 4 flow over the trailing six months up to 30, and pay-for-performance up to 30. Insiders hold 0.90% of shares outstanding. Form 4 filings over the trailing six months show $0 of open-market purchases against $305.2K of sales, a net flow of -$305.2K. One-year total shareholder return is -67.7% against CEO total pay of $795.2K (Mr. Wahid Nawabi), which the model scores as SUB-OPTIMAL ALIGNMENT.

The bear case

Appropriations Timing

Management's FY27 plan assumes the new defense budget funds its programs starting spring 2027. Any delay in appropriations pushes the back-half-loaded growth plan further out.

Switchblade Volatility

Switchblade sales fell $56.9M in Q1 FY27 on order delays. The company's flagship loitering munition is lumpy and timing-dependent.

Controls and Execution

The Q3 FY26 restatement included an $89M goodwill impairment on the cancelled SCAR space program plus a disclosed material weakness in internal controls. New CFO is still settling in.

CASCADIA ANALYTICS

The strengths

Operating Quality

The dominant listed pure-play on US tactical drones and loitering munitions, now with BlueHalo's space and directed-energy portfolio and a record backlog. Offsets: GAAP unprofitable, adjusted EBITDA margin slipped to 11.1% in Q1, an $89M goodwill impairment on the cancelled SCAR program, and a disclosed material weakness in internal controls.

Recent Trend

Q4 FY26 was a genuine blowout: 30% pro-forma revenue growth, 22% adjusted EBITDA margin, full-year adj EBITDA of $286M beating guidance. But Q1 FY27 organic revenue fell 3.5% ex-ESAero, Switchblade sales dropped $56.9M on order delays, and the Q3 restatement plus control failure dents confidence.

Forward Growth

FY27 guide is sober: revenue up only ~10% with adjusted EPS essentially flat at $3.02-$3.34. Back-end loading depends on the spring 2027 defense budget. The pipeline is the bright spot: $1.5B funded backlog, LOCUST, Titan, P550, and the ~$1B FE-1 missile opportunity.

Valuation

DCF base $86.91 implies 26% downside at $116.85. NTM P/E of 27.6x on flat EPS guidance and EV/Revenue of 3.1x NTM are full prices for 10% growth. The defense premium has outrun the fundamentals.

Cascadia scorecard

Composite score 56: Fair. Confidence Medium, as of 17-Oct-2026.

Catalysts & Risk	Near-term positives: defense budget funding in spring 2027, LOCUST and Titan production ramps, Q2 FY27 earnings showing organic recovery. Risks skew negative: appropriations timing, Switchblade delays, negative FY27 FCF on heavy CapEx, the internal-controls weakness, and valuation leaving no room for error. Risk-skewed.	50

Investment view

We rate the shares Hold, Valuation Concerns. We do not see a deteriorating business: the most recent reported quarter, Q1 FY2027, printed a Bullish earnings verdict, with adjusted EPS of $0.59 against a $0.25 estimate and revenue of $480.5M against a $456M consensus, and management reaffirmed the FY2027 revenue guide of $2.125B to $2.225B — about 10% above FY2026 actual revenue of $1,976.8M, with adjusted EPS essentially flat. Funded backlog is a record $1.5B. That record is why a Sell rating is not warranted. The Valuation Concerns qualifier is why we go no further than a Hold: our base case of $86.91 sits 26% below the $116.85 reference price, so the price, not the business, is the problem. A Q2 FY2027 quarter with organic revenue growth and Switchblade order recovery would lift Trend and Growth. A spring 2027 appropriations delay, another controls issue, or evidence that the business itself is deteriorating would change our view and would push the stock toward the $86.91 base case.

Investment view: Hold, Valuation Concerns. The $92.41 blended target implies -21%, balancing the $28.90 / $86.91 / $166.92 Bear / Base / Bull outcomes.
