Market Cap: $346M [Mkt 16-Oct-26]

Attractiveness Score

Confidence: **High** (0 pillars excluded)

Pillar Breakdown

1. Operating Quality — 72

51.7% gross margins, capital-light FCF generation, FAA/EASA certification moat with decades-long platform lives. Offset by micro-cap scale, acquisition integration risk, and debt from the Aydin deal.

2. Recent Trend — 85

Revenue 3x'd from $27.7M to $84.3M (FY22-25). Gross margin expanded 16pts YoY to 51.7%. Adjusted EBITDA +74.7%. EPS beats of +150%, +37%, +57% over the last three quarters.

3. Forward Growth — 72

$250M 2029 revenue target (nearly 3x TTM) underwritten in base DCF. eVTOL $50M option, Honeywell annuities, Aydin cross-sell. Growth is real but execution-dependent on a tiny base.

4. Valuation — 78

Spot $19.55 sits at the bear case ($19.81); base $42.88 implies +119% upside. Reverse DCF shows the market pricing below-bear growth. PEG 0.83. Among the most asymmetric setups in coverage.

5. Catalysts & Risk — 68

Q4 earnings Dec 17, eVTOL ramp, Aydin integration all near-term. Risks: backlog must convert (book-to-bill 0.85x), eVTOL timeline, net debt 1.4x, micro-cap liquidity. Size accordingly.

Investment Thesis

- **Capital-Light Avionics Compounder:** 51.7% gross margins, $12.3M of 9M FCF, and a certification moat around cockpit avionics with decades-long platform lives [Q3 PR Aug-26].
- **Platform Sprint Underway:** Aydin Displays ($16M revenue) adds defense footprint; exclusive Honeywell license adds annuities; eVTOL design win adds $50M+ of option value. Target: $250M revenue by 2029 [Note 11-Oct-26].
- **Market Prices Failure:** At $19.55 [Mkt 16-Oct-26], the market implies below-bear growth against an $82.9M backlog. Our $42.88 base case is +119% upside; even the $19.81 bear case pays at spot.

Valuation

Absolute (8/10)

DCF Base $42.88 vs spot $19.55: +119% [DCF 16-Oct-26]
PEG 0.83 [Mkt 17-Oct-26]
NTM P/E 17.8x [Mkt 17-Oct-26]

Terminal value is the Gordon perpetuity alone at 3.0% terminal growth. The EV/EBITDA exit leg on 2035 EBITDA (10.0x Bear, 13.0x Base, 16.0x Bull) is retained in the model as a cross-check and is not used in the valuation. In the base case the Gordon leg is $1,333M and the exit leg is $1,604M. At the model's terminal discount rate the exit leg implies 4.00% perpetual growth against the 3.0% assumed, and the growth-consistent exit multiple is 10.8x against the 13.0x used. The present value of terminal value is 67.9% of enterprise value in the base

Versus Peers (7/8)

EV/Rev 4.6x TTM / 4.2x NTM [Mkt 17-Oct-26]
EV/EBITDA 15.3x TTM [Mkt 17-Oct-26]

Screens modest for a certified, sole-source avionics franchise at 51.7% gross margins. Russell 2000 inclusion widened the buyer base.

Versus History (5/7)

Traded $2-7 for years [Mkt]
Now $19.55 on Russell inclusion + Aydin

The multi-year run reflects the rebrand and deal; the stock has not yet priced the $250M 2029 plan.

case (Bear 64.9%, Bull 69.2%).

Even the $19.81 bear case sits at spot. The market is pricing near-collapse against a growing backlog. Deeply undervalued if execution holds.

Catalyst Timeline

Dec 17, 2026 [Cons]
Q4 FY26 Earnings (Two-Sided): consensus EPS $0.27, revenue est $28.7M vs management's $28-30M guide. Tests backlog conversion pace.

2027 [Note 11-Oct-26]
eVTOL Production Ramp (Positive): first production award for Liberty Flight Deck with a leading Japanese developer; $50M+ nominal forward-fit value.

2027-2029 [Note 11-Oct-26]
Honeywell License Aftermarket (Positive): exclusive power-generator license on 767, KC-46, F-15 adds high-margin annuity revenue not yet in backlog.

What Would Change Our Score

Backlog deterioration (two consecutive quarters of book-to-bill below 1.0x) or loss of the eVTOL contract would cut Forward Growth sharply. Conversely, continued beat-and-raise quarters converting backlog toward the $250M target re-rate the stock toward our $42.88 base case.

Top Risk Factors (Item 1A)

1. Backlog Conversion Risk: The $82.9M backlog must convert on schedule to feed the $250M 2029 target. Q3 book-to-bill of 0.85x is below 1.0x; two consecutive quarters below 1.0x would break the thesis. [Note 11-Oct-26]

2. eVTOL Program Risk: The $50M+ eVTOL opportunity depends on a single Japanese developer's program timeline. Delays or cancellation remove the largest forward-fit growth option. [Note 11-Oct-26]

3. M&A and Leverage: $24.5M Aydin deal was funded with cash and credit-facility borrowings, leaving $43.8M net debt at 1.4x leverage. A large equity-funded deal would break the capital-light model. [PR Jul-26]

4. Micro-Cap Liquidity: $346M market cap with limited float and liquidity. Russell 2000 inclusion helps, but the stock can gap hard on small volume and remains execution-dependent. [Mkt 16-Oct-26]

Forward Growth Drivers

- Exclusive Honeywell license: power generators on 767, KC-46, F-15 with long-tailed aftermarket revenue [Note 11-Oct-26]
- Aydin Displays acquisition ($24.5M): ~$16M 2026 revenue plus naval and ground defense footprint [PR Jul-26]

- eVTOL program: $50M+ forward-fit potential, not in base-case backlog conversion [Note 11-Oct-26]
- Management's $250M 2029 revenue target underwritten in the base-case DCF [Note 11-Oct-26]

Missing / Modified Data Log

- Client note (11-Oct-26) targets superseded by the current sheet; this note uses the current sheet values (Bear $19.81 / Base $42.88 / Bull $63.39).
- TTM FCF margin unavailable: quarterly cash flow series not collected; 9M FY26 FCF $12.3M reported instead.
- YoY bookings and backlog figures not disclosed in Q3 release; logged as n/a.
- Book-to-bill was 0.85x in Q3 ($22.7M bookings on $26.7M revenue).
- IA renamed from Innovative Solutions and Support; ticker changed ISSC to IA on Aug 18, 2026.
