Growth at Scale. Q2 2026: revenue $10.17B (+50%), GMV $21.9B (+44%), TPV $101B (+56%), credit +75% YoY. All three core markets, Brazil, Mexico, Argentina, grew double digits FXN. This is a growth company at $93B, not a story stock.

Margin Compression Is a Choice. Op margin of 6.7%, down 550 bps, is deliberate reinvestment, not share loss. At $1,834 the market prices a 12% CAGR while our DCF base $2,795 needs ~22% and implies 52% upside. PEG of 1.01 agrees the market is underpricing it.

The valuation uses a multi-year unlevered free cash flow DCF. The discount rate is the live CAPM rate: the 10-year Treasury yield plus beta times the market-implied equity risk premium. Terminal value is a Gordon perpetuity on terminal-year free cash flow.

Mechanics are explicit. The bridge runs revenue to EBIT to cash taxes, then adds back D&A and subtracts capex and working-capital investment to reach unlevered free cash flow. Targets are divided by diluted shares outstanding.

Agency risk score 67 of 100: balanced, typical corporate alignment

The score follows the website's Executive Alignment & Agency Risk model: insider ownership up to 40 points, open-market Form 4 flow over the trailing six months up to 30, and pay-for-performance up to 30. Insiders hold 6.96% of shares outstanding. Form 4 filings over the trailing six months show $1.19M of open-market purchases against $0 of sales, a net flow of $1.19M. One-year total shareholder return is -10.3% against CEO total pay of $4.30M (Mr. Ariel Szarfsztejn), which the model scores as SUB-OPTIMAL ALIGNMENT.

Founder Marcos Galperin transitioned to Executive Chairman on January 1, 2026, with Ariel Szarfsztejn elevated to Chief Executive Officer. Executive compensation figures and the Summary Compensation Table are omitted from this excerpt, preventing quantitative pay-for-performance and TSR analysis. Governance mechanics show a fully independent compensation committee with robust risk oversight and established director compensation standards.

Methodology. This module reuses the website's Executive Alignment & Agency Risk model unchanged. Scores of 75 and above band as founder-mode, high conviction; 45 to 74 as balanced, typical corporate; below 45 as high agency risk. Inputs are the same feeds behind the site model (Yahoo Finance insider holdings, Form 4 transactions and executive compensation) plus the SEC DEF 14A CD&A audit from the weekly proxy pipeline. The bear case

Deliberate Margin Compression

Op margin fell 550 bps YoY to 6.7% as management lowered take rates, raised marketing, and expanded logistics. The team says reinvestment will not slow, so near-term earnings stay compressed.

Credit Risk

Credit portfolio up 75% YoY to $16.4B with higher provisions. Delinquency improved to 7.0% but a LatAm downturn could spike bad debts quickly given the growth pace.

LatAm Macro and FX

Revenue, margins, and credit quality are all exposed to ARS/BRL/MXN swings. Argentina posted 38% FXN GMV growth but consumption there remains fragile.

Competition

Amazon and Shopee compete across the region. MercadoLibre leads on logistics and fintech integration, but price competition in commerce pressures take rates.

The strengths

Operating Quality

Dominant LatAm platform with a real ecosystem moat: marketplace, payments, logistics, credit, and ads reinforcing each other. Ecosystemic users (commerce + fintech) are materially more profitable and growing 37%. FCF margin hit 37% in FY25.

Recent Trend

Operating momentum is exceptional: revenue +50%, GMV +44%, TPV +56%, credit +75% YoY. But net income fell ~11%, op margin compressed 550 bps, and EPS has missed twice in the last four quarters. The stock is down 11% in a month and sits 22%

Forward Growth

Growth is confirmed, not speculative: all three core markets growing double digits FXN, credit compounding at 75%, ads at 62% FXN, and 37% growth in the highest-value user cohort. DCF base case embeds ~22% implied CAGR, and the trajectory s

Valuation

DCF base $2,795 implies 52% upside and the market prices only a 12% CAGR, well below base-case growth. NTM PEG of 1.01 is cheap for 40%+ revenue growth. Trailing P/E of 46.6x looks elevated but compresses fast as investment normalizes.

Cascadia scorecard

Composite score 79: Attractive. Confidence High, as of 17-Oct-2026.

Ecosystemic users (commerce + fintech) are materially more profitable and growing 37%. FCF margin hit 37% in FY25. Margin compression is deliberate investment, not competitive erosion.	88

But net income fell ~11%, op margin compressed 550 bps, and EPS has missed twice in the last four quarters. The stock is down 11% in a month and sits 22% below its 52-week high. Great business, choppy stock.	70
Forward Growth	Growth is confirmed, not speculative: all three core markets growing double digits FXN, credit compounding at 75%, ads at 62% FXN, and 37% growth in the highest-value user cohort. DCF base case embeds ~22% implied CAGR, and the trajectory supports it.	92

Catalysts & Risk	Q3 earnings on Nov 4 with margin trajectory as the key debate; improving credit quality supports the fintech ramp. Risks: LatAm FX and macro (Argentina, Brazil), rising credit provisions, and a management team explicitly choosing investment over near-term profitability. Positive skew.	72

Investment view

Q3 earnings on Nov 4: the swing factor is margin trajectory vs the investment pace, not revenue. If op margins stabilize while GMV/TPV hold 30%+ FXN growth, the base case ($2,795) comes into play; credit deterioration or a LatAm FX shock would test the bear ($1,278).

Investment view: Buy. The $3,016.31 blended target implies +60%, balancing the $1,281.75 / $2,804.20 / $5,175.11 Bear / Base / Bull outcomes.
