The valuation uses a multi-year unlevered free cash flow DCF. The discount rate is the live CAPM rate: the 10-year Treasury yield plus beta times the market-implied equity risk premium. Terminal value is a Gordon perpetuity on terminal-year free cash flow.

Mechanics are explicit. The bridge runs revenue to EBIT to cash taxes, then adds back D&A and subtracts capex and working-capital investment to reach unlevered free cash flow. Targets are divided by diluted shares outstanding.

Agency risk score 55 of 100: balanced, typical corporate alignment

The score follows the website's Executive Alignment & Agency Risk model: insider ownership up to 40 points, open-market Form 4 flow over the trailing six months up to 30, and pay-for-performance up to 30. Insiders hold 3.52% of shares outstanding. Form 4 filings over the trailing six months show $0 of open-market purchases against $2.42M of sales, a net flow of -$2.42M. One-year total shareholder return is +85.1% against CEO total pay of $1.51M (Mr. Edward H. West), which the model scores as PERFORMANCE EARNED.

CASCADIA ANALYTICS

The bear case

Legacy Check Decline

Check Verification revenue was +24% in FQ3 on renewal timing but is a structurally declining legacy base at ~$90M TTM. Renewal lumpiness can produce sudden quarterly air pockets.

Lumpy License Revenue

Biometrics license activity drove the F&I beat but is explicitly lumpy; management warned it steps down sequentially in the back half of the year.

Small-Cap Competition

A ~$730M small cap competing against larger fraud and identity platforms. Thin analyst coverage (3 analysts) means less institutional support and higher volatility.

The strengths

Operating Quality

Software economics with ~80-85% gross margins, FCF conversion ~70% of adjusted EBITDA, and a strengthened balance sheet ($100M+ cash/investments). Offset by small scale ($180M revenue), lumpy license revenue, and a limited moat against larg

Recent Trend

Eight straight quarterly EPS beats. FQ3: revenue +18% (beat +6.3%), record adjusted EBITDA margin 38.5% (up from 28.6%), guidance raised again. Stock popped 18% on the print but sits below its 50-day average, so momentum has cooled.

Forward Growth

AI-driven fraud tailwind is real and durable: F&I revenue +14-28%, SaaS mix rising to 46%. But the company guides only ~8% total growth at the FY26 midpoint, and the legacy Check Verification base (~$90M TTM) is structurally soft.

Valuation

DCF base $17.20 implies only 6.8% upside at $16.11; reverse DCF prices in 6.45% CAGR, between bear (5%) and base (9%). NTM P/E 13.5x with PEG 1.38 is reasonable but not cheap. Roughly fairly priced.

Investment view

A FQ4 beat with FY27 guidance pointing to sustained mid-teens F&I growth would lift Forward Growth and justify a re-rating. A license-driven miss or further Check Verification deterioration would cut Trend and Valuation.

Investment view: Hold. The $17.41 blended target implies -1%, balancing the $14.24 / $17.18 / $21.06 Bear / Base / Bull outcomes.
