BLENDED TARGET

The valuation uses a multi-year unlevered free cash flow DCF. The discount rate is the live CAPM rate: the 10-year Treasury yield plus beta times the market-implied equity risk premium. Terminal value is a Gordon perpetuity on terminal-year free cash flow.

Mechanics are explicit. The bridge runs revenue to EBIT to cash taxes, then adds back D&A and subtracts capex and working-capital investment to reach unlevered free cash flow. Targets are divided by diluted shares outstanding.

What to monitor

Nov 5, 2026. Q3 2026 Earnings (Positive): Q2 beat consensus operating profit by ~20%. H2 carries the margin ramp to ~19% for the full year.

2026. German Budget Allocation (Positive): €108.2B defense budget for 2026. Framework contract call-offs converting to firm orders is the re-rating trigger.

2026-27. Contract Flow (Positive): Romanian €5.7B package, Skynex air-defense orders, artillery ammunition packages for Ukraine and EU members.

CASE ANALYTICS

Agency risk score 32 of 100: high agency risk, the value-trap profile

The score follows the website's Executive Alignment & Agency Risk model: insider ownership up to 40 points, open-market Form 4 flow over the trailing six months up to 30, and pay-for-performance up to 30. Insiders hold 0.00% of shares outstanding. Form 4 filings over the trailing six months show $0 of open-market purchases against $0 of sales, a net flow of $0. One-year total shareholder return is -42.4% against CEO total pay of $6.77M (Mr. Armin Theodor Papperger), which the model scores as SUB-OPTIMAL ALIGNMENT.

SEC proxy audit

N/A. The weekly DEF 14A proxy pipeline holds no CD&A audit record for this ticker (foreign private issuers file no DEF 14A), so no audit findings are shown.

Methodology. This module reuses the website's Executive Alignment & Agency Risk model unchanged. Scores of 75 and above band as founder-mode, high conviction; 45 to 74 as balanced, typical corporate; below 45 as high agency risk. Inputs are the same feeds behind the site model (Yahoo Finance insider holdings, Form 4 transactions and executive compensation) plus the SEC DEF 14A CD&A audit from the weekly proxy pipeline. The bear case

Negative Free Cash Flow

Operating free cash flow was -€1.6B in H1 2026 on postponed advance payments, inventory builds, and uncollected receivables. Management expects a significantly negative full-year print.

Execution Delays

Media reports cite delivery delays on the wheeled armored vehicle and Skyranger air-defense system, plus possible quality defects in protective plates.

Aggressive 2030 Target

The €50B 2030 target includes acquisitions and assumes flawless capacity ramp. Missing it would re-rate the growth premium fast.

Backlog Definition

The €80.5B Rheinmetall Backlog includes expected framework-agreement call-offs, not just signed firm orders. Part of the headline number is not yet contracted.

ADR Liquidity & Governance

Unsponsored ADR with thin daily volume (~13k shares on Oct 16). CEO Papperger's leadership style and concentrated decision-making have drawn criticism.

The strengths

Operating Quality

€80.5B backlog gives multi-year visibility; ROCE was 26.4% in 2024 and operating margin expanded from 12.8% to 18.5% in two years. Net debt is modest at 0.7x EBITDA. The black mark: operating free cash flow went deeply negative in H1 2026 o

Recent Trend

Revenue growth of 36%, 29%, and 39% (H1 2026) with margins climbing each year. Backlog went from €38.3B to €80.5B in under three years. Q2 2026 beat consensus operating profit by ~20%. The momentum is undeniable.

Forward Growth

2030 target of €50B sales at >20% margin is a 5x from 2025. FY26 guides ~40% revenue growth. German €108.2B defense budget and EU rearmament provide the demand. The discount is execution: reported delivery delays and capacity bottlenecks.

Valuation

DCF base $345.50 implies +40.9% upside, and the market's implied 18% CAGR sits below even the 27% bear case, which is pessimistic. Forward P/E of ~26-29x carries a premium to Leonardo (23x) and BAE (20x), but growth is 2-3x theirs and PEG i

Investment view

Further FCF deterioration or delivery delays would cut Operating Quality and Trend. Conversely, German budget call-offs converting to firm orders or a major framework win could re-rate the stock toward the DCF base ($345.50).

Investment view: Buy. The $353.80 blended target implies +49%, balancing the $209.33 / $346.15 / $513.58 Bear / Base / Bull outcomes.
