The valuation uses a multi-year unlevered free cash flow DCF. The discount rate is the live CAPM rate: the 10-year Treasury yield plus beta times the market-implied equity risk premium. Terminal value is a Gordon perpetuity on terminal-year free cash flow.

Mechanics are explicit. The bridge runs revenue to EBIT to cash taxes, then adds back D&A and subtracts capex and working-capital investment to reach unlevered free cash flow. Targets are divided by diluted shares outstanding.

The bear case

Earnings Quality

GAAP earnings remain depressed by amortization and restructuring; the non-GAAP story must eventually convert to cash.

Telecom Drag

Legacy telecom carrier spending is structurally weak and drags on the core NSE business.

Integration Risk

Spirent integration missteps would undermine the growth thesis and the multiple.

The strengths

Operating Quality

Turnaround in progress: Spirent diversifies into data center and A&D, but GAAP profitability is thin and the non-GAAP gap (amortization, restructuring) is wide. ROIC is below average.

Recent Trend

FY26 revenue +40%, non-GAAP EPS +113%, operating margin +630bps. Q4 beat on both lines. The operational momentum is undeniable.

Forward Growth

Data center test demand (800G/1.6T), Spirent cross-sell, A&D positioning solutions. Q1 FY27 guide implies continued sequential growth. Consensus sees +23.5% FY27 revenue.

Valuation

At $33.38 vs $40.13 DCF base, the stock offers ~20% upside. NTM P/E 17.1x and PEG 1.34 are reasonable for the growth rate. Not cheap, not stretched.

Cascadia scorecard

Composite score 70: Attractive. Confidence High, as of 17-Oct-2026.

Investment view

A Q1 FY27 miss would cut Trend and Growth. Sustained 20%+ growth with GAAP earnings conversion supports a higher multiple.

Investment view: Buy. The $38.49 blended target implies +11%, balancing the $18.78 / $40.82 / $53.55 Bear / Base / Bull outcomes.
