Investment Thesis

The Ad Engine Has Never Been Stronger. $59.4B ad revenue (+27%) with 14% impression growth and 12% pricing gains, both AI-driven. Family ARPP up 23.5% to $16.86 [Q2'26 10-Q]. The core business is a compounding machine. The Market Prices the Spend, Not the Returns. $31.1B quarterly capex nearly consumed all of operating cash flow. But the stock at $648.85 [Mkt 16-Oct-26] prices in 4.7% implied CAGR, below our 6.6% bear case. Pessimism is in the price. Upside If AI Pays. DCF base $938.04 implies 45% upside. WhatsApp

The latest print

The Market Prices the Spend, Not the Returns. $31.1B quarterly capex nearly consumed all of operating cash flow. But the stock at $648.85 prices in 4.7% implied CAGR, below our 6.6% bear case. Pessimism is in the price.

Upside If AI Pays. DCF base $938.04 implies 45% upside. WhatsApp paid messaging at a $2B+ run rate, Threads at 500M MAU, and MTIA custom silicon are monetization and margin levers the market is not paying for.

BLENDED TARGET

The valuation uses a multi-year unlevered free cash flow DCF. The discount rate is the live CAPM rate: the 10-year Treasury yield plus beta times the market-implied equity risk premium. Terminal value is a Gordon perpetuity on terminal-year free cash flow.

Mechanics are explicit. The bridge runs revenue to EBIT to cash taxes, then adds back D&A and subtracts capex and working-capital investment to reach unlevered free cash flow. Targets are divided by diluted shares outstanding.

What to monitor

21 Oct 2026. Q3 2026 Earnings (Two-Sided): Consensus $63.3B revenue, ~$6.6 EPS. Guide was $61-64B; stock rallied 37% since July, so the bar is high.

2026-2027. Capex Payback Test (Two-Sided): FY26 guide $130-145B capex; Q3 capex est ~$41B with FCF est -$9.1B. Any 2027 acceleration without returns narrative tests enthusiasm.

Mark Zuckerberg continues to receive an annual base salary of $1 with no participation in annual cash bonus programs and no additional equity grants. Total reported executive compensation for the CEO is predominantly comprised of perquisites related to his overall personal security program. Executive alignment is maintained fundamentally through his substantial controlling equity stake amid 2025 revenue expansion of 22% to $201 billion.

Proxy audit source: SEC EDGAR DEF 14A, audited 2026-10-18 by the weekly proxy pipeline. Filing: https://www.sec.gov/Archives/edgar/data/1326801/000162828026025532/meta-20260416.htm

The bear case

Capex Payback

FY2026 capex guide of $130-145B, ~2x FY25, collapsed quarterly FCF 91% to $784M. If AI returns do not materialize, the buildout permanently impairs the cash machine.

Reality Labs Drain

Reality Labs lost $4.62B in Q2 alone with cumulative losses approaching $90B. The metaverse bet remains a large, open-ended drain with no return timeline.

Regulatory Overhang

A $2.4B legal-proceedings charge (linked to youth-safety litigation) plus $1.18B in severance hit Q2. Regulatory and litigation exposure remains a recurring wildcard.

The strengths

Operating Quality

The best advertising business ever built: $59.4B ad revenue at ~80% gross margins, 3.6B daily actives, AI improving both volume and pricing. ROE ~33%. Reality Labs loses ~$4.6B/quarter and drags, but the Family of Apps funds it easily. The model's terminal-year EBIT margin (46% in the base case) sits below Meta's own filed peak of 49.7% in FY2017, against 42.2% in FY2024 and 41.4% in FY2025, and is reached mechanically rather than by assumption: as capex normalizes to maintenance levels from 2032, base-case depreciation rolls off from $166B in 2031 to $91B in 2035. Microsoft's filed FY2026 operating margin of 46.8% shows the level is attainable at platform scale.

Recent Trend

Top line is accelerating (+28% vs +22% prior year), but the mix is deteriorating: op margin compressed 43% to 31%, EPS fell 13% YoY and missed consensus by $1.01, and FCF collapsed 91% to $784M as capex doubled.

Forward Growth

Consensus sees Q3 revenue +23.6% and FY26 EPS of $27.94, with FY27 EPS at $34.39. AI monetization backlog (WhatsApp, Threads, business agents, compute rentals) is real optionality. Near-term earnings growth is muted by the capex cycle.

Valuation

DCF base $938.04 implies 45% upside at $648.85; reverse DCF prices in 4.7% CAGR, below our 6.6% bear case. NTM P/E 20.5x with PEG 0.97 is undemanding for 20%+ growth. The market prices the spend, not the returns.

Cascadia scorecard

Composite score 73: Attractive. Confidence High, as of 16-Oct-2026.

Catalysts & Risk	Q3 earnings Oct 21 is the near-term event; the stock is up 37% since July on AI optimism. Key risk is the capex payback narrative: Q3 FCF expected -$9.1B, 2027 FCF possibly deeply negative. Regulatory/legal overhang persists ($2.4B charge in Q2).	62

Investment view

A Q3 beat with strong Q4 guidance and a credible capex-payback narrative would push the bull case ($1,247.57) into play. A weak print or 2027 capex acceleration without returns evidence would cut Trend and Forward Growth sharply.

Investment view: Buy. The $934.73 blended target implies +44%, balancing the $615.27 / $938.04 / $1,247.57 Bear / Base / Bull outcomes.
