CASCADIA ANALYTICS

INVESTMENT SCORECARD

TTMI

TTM Technologies, Inc. (NASDAQ)

As-of: 23-Oct-2026 | Latest Filing: Q3 2026 (8-K) | Currency: USD

$79.95 [Mkt 23-Oct-26]

Market Cap: $8.3B [Mkt 23-Oct-26]

Attractiveness Score

Confidence: **High** (0 pillars excluded)

Pillar Breakdown

1. Operating Quality — 70

Largest North American PCB manufacturer with A&D qualifications that take years to earn. Margins are thin for the industry (6% net) but improving. Cyclical end markets.

2. Recent Trend — 90

Record quarterly revenue and EPS, +60% growth, book-to-bill 2.13, EBITDA margin at 20.1%. Data center +115% YoY. Firing on all cylinders.

3. Forward Growth — 88

N+M technology ($600M H2 revenue), 15-20% organic growth guided for 2027-28, Epiq acquisition adds new vectors. Multi-year AI infrastructure tailwind.

4. Valuation — 65

At $79.95 vs $102.55 DCF base, the shares screen far below our guide-anchored base case. NTM P/E 11.9x and PEG 0.36 are outright cheap for 60% growth, and the guide-anchored DCF now agrees with the multiples. Market misprices the inflection.

5. Catalysts & Risk — 75

The Q3 print and N+M ramp are near-term positives. Epiq integration is the risk. PCB is cyclical; AI capex pauses would hit hard. Positive skew.

Investment Thesis

- **AI PCB Pure Play:** Data Center & Networking is 41% of sales growing 115% YoY. N+M asymmetric PCB technology entering volume production with $600M H2 revenue expected. Book-to-bill 2.13 [8-K Q3 2026].
- **Inflection in Profitability:** Record $1.20B quarterly revenue (+60%), record non-GAAP EPS of $1.46, EBITDA margins expanding to 20.1%. FY25 net margin of 6.1% doubled from 2.3% [10-K FY25].
- **Mispriced Growth:** At $79.95, NTM P/E is 11.9x with PEG of 0.36 for a company growing 60%. We now anchor the DCF to guided FY2026 revenue of $4,480M (the raised full-year guide midpoint in the Q3 2026 release, including the closed Epiq and Swiss Technology Group acquisitions), with fiscal 2027 set by scenario from the preliminary guide of $6.5B to $6.75B, and our $102.55 base sits above spot. The earnings multiple and the guide-anchored DCF agree that the market underappreciates the trajectory.

Key Operating Metrics

Metric	Latest	YoY Change	3Y Trend
Revenue (Q3 2026)	$1.204B [8-K Q3 2026]	+60% [8-K Q3 2026]	Up
EPS (Q3 2026, non-GAAP)	$1.46 [8-K Q3 2026]	Record [8-K Q3 2026]	Up
Adj. EBITDA (Q3 2026)	$242.3M [8-K Q3 2026]	+100% [8-K Q3 2026]	Up
Book-to-Bill	2.13 [8-K Q3 2026]	Strong [8-K Q3 2026]	Up
Data Center Mix	41% [8-K Q3 2026]	+115% growth [8-K Q3 2026]	Up
FY26 Revenue Outlook (raised)	$4.48B [8-K guid]	n/a [n/a]	Up
Revenue (FY25)	$2.91B [10-K FY25]	+19.1% [10-K FY25]	Up

Historical Financial Trend

Metric	FY21	FY22	FY23	FY24	FY25
Revenue	$2.25B [10-K FY21]	$2.50B [10-K FY22]	$2.23B [10-K FY23]	$2.44B [10-K FY24]	$2.91B [10-K FY25]
Gross Margin	16.8% [10-K FY21]	17.2% [10-K FY22]	16.1% [10-K FY23]	17.9% [10-K FY24]	19.4% [10-K FY25]
Net Margin	4.1% [10-K FY21]	5.8% [10-K FY22]	-3.2% [10-K FY23]	2.3% [10-K FY24]	6.1% [10-K FY25]

Valuation

Absolute (7/10)

NTM P/E 11.9x [Mkt 16-Oct-26]
DCF Base $102.55 vs $79.95 spot [Mkt 16-Oct-26]
PEG 0.36 [Mkt 16-Oct-26]

PEG of 0.36 is deeply cheap. The rebased DCF base sits above spot, so the DCF and the earnings multiples now point the same way.

Versus Peers (7/8)

Electronic components peers 12-18x NTM P/E [Peers 16-Oct-26]

Trades at the low end of peer multiples despite superior growth.

Versus History (6/7)

Trading above historical multiples [Mkt 16-Oct-26]

Re-rating reflects the AI mix shift; still cheap on earnings.

Catalyst Timeline

Oct 2026 [8-K Q3 2026]
Q3 2026 earnings reported: sales $1,203.9M (+60% YoY), non-GAAP EPS $1.46, adjusted EBITDA margin 20.1%. Q4 guided to $1.42B-$1.44B.

H2 2026 [8-K guid]
N+M asymmetric PCB volume ramp; ~$600M revenue expected in H2 alone.

Top Risk Factors (Item 1A)

1. Cyclicality: PCB demand tracks electronics cycles; an AI capex pause would hit the data center segment hard. [10-K FY25]

2. M&A Execution: $1.1B Epiq acquisition adds integration and leverage risk. [10-K FY25]

3. Competition: Asian competitors compete on price; technology leadership (N+M) must be sustained. [10-K FY25]

2027 [8-K guid]
Epiq $1.1B acquisition close adds AI-enabled radios and space compute.

What Would Change Our Score

A Q3 miss or N+M yield issues would cut Growth and Trend. Continued 30%+ growth with margin expansion supports a higher multiple.

Forward Growth Drivers

- Data Center & Networking: 41% of sales, +115% YoY on AI buildout [8-K Q3 2026]
- N+M asymmetric PCB technology entering volume production [8-K guid]
- 15-20% organic revenue growth targeted for 2027 and 2028 [8-K guid]

Missing / Modified Data Log

- FCF was near-zero in FY25 due to growth capex; used EBITDA trajectory for cash assessment.
- 5-year multiple history from market data, tagged [Mkt 16-Oct-26].
