Investment Thesis

Eastern Rail Duopoly. One of two Class I railroads east of the Mississippi. Operating margin 38.3%, OR down to 61.7% and improving, ROE ~25%. The moat is structural [PR 22-Jul-26]. Record Q2, Raised Guide. $3.94B revenue (+10.1%), EPS $0.54 beat $0.52. FY2026 guide raised: revenue mid-to-high single digits, margin +350bps, FCF +80%. Truck-to-rail conversions are real [PR 22-Jul-26]. Market Prices Perfection. At $48.42 [Mkt 16-Oct-26], the reverse DCF implies 22.0% revenue CAGR, above our $38.03 bull case. Great

The latest print

Record Q2, Raised Guide. $3.94B revenue (+10.1%), EPS $0.54 beat $0.52. FY2026 guide raised: revenue mid-to-high single digits, margin +350bps, FCF +80%. Truck-to-rail conversions are real.

Market Prices Perfection. At $48.42, the reverse DCF implies 22.0% revenue CAGR, above our $38.03 bull case. Great business, full price. We rate the shares Hold, Valuation Concerns, and we would not sell into strength: the business is healthy, and the price is the problem.

BLENDED TARGET

The valuation uses a multi-year unlevered free cash flow DCF. The discount rate is the live CAPM rate: the 10-year Treasury yield plus beta times the market-implied equity risk premium. Terminal value is a Gordon perpetuity on terminal-year free cash flow.

Mechanics are explicit. The bridge runs revenue to EBIT to cash taxes, then adds back D&A and subtracts capex and working-capital investment to reach unlevered free cash flow. Targets are divided by diluted shares outstanding.

Agency risk score 42 of 100: high agency risk, the value-trap profile

The score follows the website's Executive Alignment & Agency Risk model: insider ownership up to 40 points, open-market Form 4 flow over the trailing six months up to 30, and pay-for-performance up to 30. Insiders hold 0.22% of shares outstanding. Form 4 filings over the trailing six months show $0 of open-market purchases against $9.13M of sales, a net flow of -$9.13M. One-year total shareholder return is +33.9% against CEO total pay of $2.19M (Mr. Stephen F. Angel), which the model scores as PERFORMANCE EARNED.

BASE SALARY	STOCK AWARDS	NON-EQUITY INCENTIVE	OTHER COMPENSATION
N/A	N/A	N/A	N/A

Stephen F. Angel was appointed President and CEO in September 2025, with 96% of his prorated 2025 target compensation structured as at-risk variable equity and performance incentives. Incentive payouts demonstrated strict performance accountability: the 2025 MICP delivered only 76% of target after financial metrics hit 0%, while the 2023-2025 LTIP paid out at just 5% of target following a 0.79x relative TSR modifier reduction. Although final Summary Compensation Table figures appear on page 91 outside this excerpt, disclosed incentive mechanics show tight committee alignment with shareholders.

The bear case

Overvaluation vs Model

Base case $31.73 is 34% below spot; even the $38.03 bull case trails the stock, and all three cases sit below the current price. The market's implied 22.0% revenue CAGR prices in flawless execution we do not see.

Coal Exposure

Coal remains a double-digit share of revenue and is structurally declining; intermodal and merchandise must keep offsetting it.

Labor Costs and Service Execution

High labor costs and rail network disruptions were flagged as Q3 headwinds. Union labor is the largest controllable cost and bargaining power sits with labor.

Leverage and Capex Intensity

$18.9B of debt on a 1.43x debt-to-equity ratio with a 0.81 current ratio. Capex runs ~$2.4B a year; FCF can swing hard in a downturn.

The strengths

Operating Quality

Eastern Class I duopoly with one of two networks east of the Mississippi. 38.3% operating margin and 61.7% OR improving. Heavy moat, but revenue fell three straight years and leverage is high (D/E 1.43x).

Recent Trend

Record Q2: revenue +10%, EPS +23%, OR -2.4pts, FCF swung to +$687M. Volume rebound broad-based. But annual revenue declined 2022-2025 and net margins compressed 27.7% to 20.5%.

Forward Growth

Management guides mid-to-high single digit revenue growth with margin +350bps. Intermodal conversions have legs. Railroads are structurally low-growth, low-double-digit at best, and the DCF embeds the same.

Valuation

DCF base $31.73 sits 34% below the $48.42 spot. Reverse DCF implies 22.0% revenue CAGR, above our $38.03 bull case. Market prices perfection on a 4-5% grower.

Cascadia scorecard

Composite score 60: Fair. Confidence Medium, as of 17-Oct-2026.

Investment view

We rate the shares Hold, Valuation Concerns. The Q2 2026 print was Bullish, with net income up 24.5% year over year and an EPS beat, and the broader picture holds net income essentially flat year over year with steady free cash flow, so we see a healthy business rather than a deteriorating one, and we would not sell into strength. The Valuation Concerns qualifier reflects the price: all three cases, $20.96, $31.73 and $38.03, sit below the current price, and our base case sits 34% below the $48.42 reference price. A Q3 2026 miss or operating ratio deterioration would be the kind of business deterioration that could change our view. Conversely, sustained mid-single-digit volume growth with the operating ratio moving toward sub-60% could make the market implied growth credible and lift the Valuation score.

Investment view: Hold, Valuation Concerns. The $30.61 blended target implies -37%, balancing the $20.96 / $31.73 / $38.03 Bear / Base / Bull outcomes.
