BLENDED TARGET

The valuation uses a multi-year discounted cash flow framework across three scenarios. Discount rates are market-implied and updated from live market inputs. The scenario matrix above states what each scenario assumes in growth and margin terms and what it produces: horizon revenue, enterprise value, equity value and the per-share target.

We judge a scenario by whether its growth and margin posture is supported by the filed record and the company's own guidance, and we disclose below how much of each scenario's value sits in the terminal year, because that share is where the valuation risk concentrates.

What to monitor

Dec 2026. Q3 FY27 Earnings (Positive): $429-431M revenue guide implies 31% normalized growth. Test of whether ARR momentum holds as migrations tailwind fades.

FY27. Identity & Agent Cloud Scale (Positive): Identity hit $20M ARR in 3 quarters; Agent Cloud has 15+ paying customers. New product legs are the upside lever.

Jan 2027. FY2028 Outlook (Two-Sided): First full guide after the migration tailwind fully rolls off. Reported revenue growth faces a material-rights headwind.

SEC proxy audit, DEF 14A filed 2026-04-15

Alignment grade C. PAY INCREASE (+6.9%). Bipul Sinha, fiscal 2026 vs fiscal 2025; total compensation change year on year: +6.9%.

BASE SALARY	STOCK AWARDS	NON-EQUITY INCENTIVE	OTHER COMPENSATION
$620,000	$0	$609,027	$0

The CEO’s compensation rose primarily due to a 7.8% base salary increase and a full target bonus payout, while no equity awards were granted. The Compensation Committee justified the pay hike with market data and a focus on retaining talent, but the lack of equity dilutes alignment with long-term shareholder value. Accountability to TSR remains limited because the CEO’s total compensation is largely cash-based.

The bear case

Material-Rights Headwind

CFO flagged that the sharp drop in material-rights revenue is a meaningful headwind to reported revenue growth for FY27.

Migration Tailwind Fading

The legacy-to-cloud migration run is wrapping up this year, which will make cloud net-new ARR comparisons tougher going forward.

Dilution & SBC

Heavy stock-based compensation drove a $1.15B GAAP loss in FY25 and negative equity; share count keeps inflating and diluting holders.

Sell-the-News Pattern

Shares have sold off after multiple beats (Q1 and Q2 FY27), and the stock trades 12% below its 52-week high with elevated beta.

The strengths

Operating Quality

81% non-GAAP gross margins with net-cash balance sheet ($1.75B cash vs $1.13B converts). NRR above 119% shows real expansion. Offset: still GAAP unprofitable with negative equity and heavy stock-based comp.

Recent Trend

ARR compounding at 33-34% for three straight years. Normalized revenue growth accelerated to 43% in Q2 FY27. FCF swung from $33M to $253M in one year and contribution margin jumped 9.4% to 14.0%. Textbook inflection.

Forward Growth

FY27 guide: 28% revenue and 29% ARR growth with positive non-GAAP EPS. Identity and Agent Cloud are credible new legs. Discount: cloud migration tailwind is wrapping up and material-rights headwinds drag reported growth.

Valuation

DCF base $127.06 sits 1% below the $128.73 price, and the reverse DCF implies a demanding 37.8% CAGR. The offset: at ~14.5x sales on ~46% growth, it is the cheapest growth-adjusted multiple in the AI-cyber peer set.

Cascadia scorecard

Composite score 69: Attractive. Confidence High, as of 17-Oct-2026.

Investment view

A Q3 FY27 miss on ARR or NRR slipping below 115% would cut Trend and Forward Growth. Conversely, Identity and Agent Cloud scaling faster than expected could make the bull case ($160.02) reachable.

Investment view: Hold. Our $127.06 Base case sits 1.3% below the $128.73 reference price, inside the standing Hold band, and the $128.27 blended target is effectively in line with the current price, balancing the $98.93 / $127.06 / $160.02 Bear / Base / Bull outcomes.
