Investment Thesis

Inflection Is Real. Revenue of $34M in Q2 [8-K guid], up 126% YoY, with the FY26 guide raised to at least $140M [8-K guid] for the second straight quarter. Net margin improved to -9.3% [10-Q Q2 2026] from -42% a year ago. Orders Back the Story. $24M European drone order, multi-year Stark Future deal over $100M, Redwire Stalker Block 30 supply, and a $75M DoW grant to build US drone-cell capacity [8-K]. Demand is confirmed, not hoped. Price Ahead of Fundamentals. At $7.58 [Mkt 17-Oct-26], the DCF base of $5.20

The latest print

Orders Back the Story. $24M European drone order, multi-year Stark Future deal over $100M, Redwire Stalker Block 30 supply, and a $75M DoW grant to build US drone-cell capacity. Demand is confirmed, not hoped.

Price Ahead of Fundamentals. At $7.58, the DCF base of $5.20 implies 31% downside, and 14.7x TTM revenue is a steep price for a still-loss-making company. Growth deserves a premium; the current premium prices in the bull case.

BLENDED TARGET

The valuation uses a multi-year unlevered free cash flow DCF. The discount rate is the live CAPM rate: the 10-year Treasury yield plus beta times the market-implied equity risk premium. Terminal value is a Gordon perpetuity on terminal-year free cash flow.

Mechanics are explicit. The bridge runs revenue to EBIT to cash taxes, then adds back D&A and subtracts capex and working-capital investment to reach unlevered free cash flow. Targets are divided by diluted shares outstanding.

Valuation cross-check

EV/Revenue (TTM) 14.7x

DCF Base $5.20

P/E (fwd) 77x

DCF implies 31% downside. A 77x forward P/E and 14.7x revenue for a pre-profit company prices in near-perfect execution.

Battery-material peers trade at high revenue multiples pre-scale

AMPX is not an outlier vs speculative battery peers, but the peer group itself is expensive; defense-contracted revenue earns only a partial premium.

52-week range $6.68 - $24.23

Trading 68% below its highs, but multiples are still rich relative to the company's own trading history given it remains loss-making.

What to monitor

Nov 2026. Q3 2026 Earnings (Two-Sided): Must show H2 delivery against the $140M guide; a beat would validate the EBITDA breakeven story.

Q4 2026. SiCore 500 Commercial Availability (Positive): 500 Wh/kg cell on conventional lines; de-risks the industrialization question.

2026-2027. DoW Grant Milestones (Two-Sided): Up to $75M OTA, but majority is unfunded and tied to appropriations; accepted deliverables unlock payments.

Agency risk score 20 of 100: high agency risk, the value-trap profile

The score follows the website's Executive Alignment & Agency Risk model: insider ownership up to 40 points, open-market Form 4 flow over the trailing six months up to 30, and pay-for-performance up to 30. Insiders hold 1.18% of shares outstanding. Form 4 filings over the trailing six months show $0 of open-market purchases against $6.32M of sales, a net flow of -$6.32M. One-year total shareholder return is -33.5% against CEO total pay of $768.6K (Mr. Thomas Michael Stepien), which the model scores as SUB-OPTIMAL ALIGNMENT.

The bear case

Grant Funding Risk

A majority of the $75M award is unfunded and depends on future appropriations, with payments tied to government-accepted milestones. Delivery delays or funding gaps would stall the 12M-cells-per-year plan.

Cash Runway

$74.5M in cash against a recent quarterly burn pace that has been lumpy. If the promised EBITDA breakeven slips, dilution is the likely backstop.

Volatility and Shorts

Beta of 2.35, short interest near 17-19% of float, and the stock trading 68% below its 52-week high. Any execution miss gets punished hard.

The strengths

Recent Trend

Revenue +153% (Q1) then +126% (Q2), guidance raised twice in a row, net margin improved from -42% to -9% in a year, and EBITDA breakeven is imminent. One of the cleanest inflection trajectories in coverage.

Forward Growth

$24M European drone order, $100M+ multi-year Stark Future deal, Redwire Stalker Block 30 supply wins, and a $75M DoW OTA (mostly unfunded, tied to appropriations). The $140M FY26 guide is confirmed by orders, but 2027+ capacity depends on c

Valuation

DCF base $5.20 implies 31% downside at $7.58. EV/Revenue TTM 14.7x is rich for a cash-burning battery maker, though NTM 6.5x reflects the growth. The $22 analyst mean target assumes the 2030 plan is fully funded and executed.

Cascadia scorecard

Composite score 62: Fair. Confidence Medium, as of 17-Oct-2026.

PILLAR	RATIONALE	SCORE
Operating Quality	Pre-profit with no moat from earnings, but the technology is genuinely validated: 500 Wh/kg SiCore cells, NDAA-compliant supply, DoW funding, and paying customers. Gross margin hit 27% and the capital-light contract manufacturing model keeps balance sheet risk contained. Debt is negligible at $6.4M.	50
Recent Trend	Revenue +153% (Q1) then +126% (Q2), guidance raised twice in a row, net margin improved from -42% to -9% in a year, and EBITDA breakeven is imminent. One of the cleanest inflection trajectories in coverage.	85
Forward Growth	$24M European drone order, $100M+ multi-year Stark Future deal, Redwire Stalker Block 30 supply wins, and a $75M DoW OTA (mostly unfunded, tied to appropriations). The $140M FY26 guide is confirmed by orders, but 2027+ capacity depends on contract-manufacturing execution.	78

Catalysts & Risk	Q3 earnings test H2 delivery, SiCore 500 commercial availability in Q4, and DoW milestone payments are near-term positives. Against that: the bulk of the $75M grant is unfunded, short interest sits near 17-19%, insider selling of $1.27M last quarter, and a 2.35 beta with the stock 68% off its highs. Two-sided skew.	55

Investment view

A Q3 2026 beat with clean cash conversion would lift Forward Growth and Trend and could justify the current multiple. A miss on H2 delivery or DoW milestone delays would confirm the valuation call and likely drive the stock toward the $5.20 base.

Investment view: Hold, Valuation Concerns. The $5.73 blended target implies -24%, balancing the $2.18 / $5.20 / $10.36 Bear / Base / Bull outcomes.
